

BusPlanner Workflow

Advanced Student Transportation Workflow Tools

Streamline your day-to-day tasks with BusPlanner Workflow. Lower operating costs by removing redundant bus routes & increase student ridership with the same number of buses!

BusPlanner Workflow puts you in the driver's seat to create custom forms, that help you consolidate information to streamline operations. Organize incident reports, public requests & other key documents through a single, convenient portal.

With BusPlanner Workflow, you can:

- Save time by automating common requests
- Pull up historical records for each submission
- Archive documents to reduce clutter
- Autofill forms to ensure data consistency

Why Add BusPlanner Workflow:

- **Automate Requests:** Streamline routing tasks & requests to boost efficiency.
- **Centralize Management:** Access incident reports, public requests & essential forms in one place.
- **Track Workflows:** Manage & track the progress of various tasks within the transportation office.

We have **better access to data** by looking at Workflow because we are able to see which route technicians are receiving the most requests & what type of requests are coming in.

Miami-Dade County Public Schools, FL

BusPlanner Workflow is your one-stop-shop for your needs.

Include BusPlanner Workflow in your routing service with BusPlanner today!
